

soooo... the classical
approach

- It works in theory
- ... but times have changed
- Powerful component primitives
- Data Down, Actions Up

in components we trust

what if...

- routes were for routing
- controllers were just a “top-level” component for the current route.
- components were smarter and could be responsible

soooo... the classical approach

- It works in theory
- ... but times have changed
- Powerful component primitives
- Data Down, Actions Up
